Assessment: ENG7-READ-01

Marking Rubric - Grade 7 English - Reading Response - The Lighthouse Keeper

C1 (Q1) Who and what each evening (evidence checklist)

Scoring method: evidence checklist (evidence sum). One point for each item the answer shows; the line's mark is the sum, out of 2.

C1a Names the main character (1 point): present if the answer names Tomas as the main character.

C1b States the evening task (1 point): present if the answer says he lights the lamp each evening (climbing the steps or cleaning the lens may also be mentioned).

C2 (Q2) Why the lamp is kept burning

Full (3): Gives a reason (someone might still need the light, such as a small boat) AND supports it with evidence from the passage.

Adequate (2): Gives a sensible reason but with no evidence from the passage.

Limited (1): Repeats the passage ('he lights it every night') without a reason.

None (0): No relevant answer.

C3 (Q3) How Tomas changes (described in the teacher's own words)

Scoring method: described in the teacher's own words. The teacher wrote:

"I give full marks when the student explains that Tomas goes from doubting that the lamp is worth lighting to being sure that it is, and backs this up with a detail from the ending, such as climbing the steps a little taller or no longer wondering. If they describe that change but give no detail, that is most of the marks. If they only retell what happens, such as the boat arriving, without saying how Tomas himself changes, they get a little credit. An answer with nothing relevant gets nothing."

The system derived these bands from that description, and the teacher confirmed them:

Evidenced (3): Says Tomas starts unsure whether the work matters and ends sure that it does, AND gives a detail that shows it (the taller climb, or no longer wondering).

Change (2): Describes how Tomas changes (unsure to confident, or doubting to proud) but gives no detail from the passage.

Retell (1): Retells what happens in the story (the boat arrives) without describing a change in Tomas.

None (0): No relevant answer.
